

PIGEON BUSTERS

We'll help you avoid ineffective systems

Pigeon Busters would never recommend the use of the products below. In fact we consider them completely useless and any reputable company would advise you to stay away from using them:

- Sticky gels
- Owls, balloons, tapes and decoys
- Chicken wire
- Audio devices with speakers that emit signals audible to humans
- So called ultrasonic devices (most birds don't hear in that frequency range)
- Scents and sprays
- Light reflecting or laser devices
- Avitrol (poison, illegal in many areas)
- Birth control
